

LIST OF WORKSHOP PARTICIPANTS

Surname	Title and Given Name	Department	E-mail	Attending this W/S
King	Dr Christopher	Dept. Aged Care Medicine / Peninsula Health	christopher.king@med.monash.edu.au	I am leading a DHA dementia research grant application from Peninsula Health. My research interests are in social and cultural dimensions of ageing, aged care and dementia.
Mathews	Prof. Mark	Faculty of Health Sciences, University of Sydney	m.mathews@fhs.usyd.edu.au	In the United States I had funding from the National Institute on Aging, the Alzheimer's Association, and several nursing homes to evaluate dementia-care programs and behavioural strategies for providing care. To establish a successful program of research on assessment and effective provision of care for persons with dementia in Australia, I need to learn about NHMRC funding criteria.
Pinnington	Mr Peter	ANU Medical School	peter.pinnington@anu.edu.au	I have an interest in dementia as a lecturer in Indigenous health at the ANU Medical School
Sargent	Ms Margaret	Co-ordinate group Dementia Sufferers and Carers	margsarge@hotmail.com	-
Moss	Mr John	Discipline of Public Health	john.moss@adelaide.edu.au	I am a health economist and health services research with considerable experience of research into discharge planning from the acute hospital. I am considering a project to investigate discharge or transition planning for people with dementia.
Pemberton	Mr Graham	Dementia Collaborative Research Centre - Consumers	g.pemberton@qut.edu.au	As Manager of the Dementia CRC, I will be involved in writing NHMRC bids. I also wish to meet researchers in Dementia

Surname	Title and Given Name	Department	E-mail	Attending this W/S
Kneebone	Dr Tony	Neuropsychology Unit, Flinders Medical Centre	tony.kneebone@fmc.sa.gov.au	Learn of specific areas of strategic research interest in dementia to NHMRC Interests: cognitive reserve in elderly, modelling cognitive effects of cerebral small vessel disease through the study of CABG and arthroplasty
Moyle	Prof Wendy	Research Centre Practice Innovation, Griffith Uni	w.moyle@griffith.edu.au	As a dementia care researcher interested in research that focuses on social engagement and quality of life it is imperative that my research objectives fit with and compliment dementia policy and planning. This workshop will allow me the opportunity to meet with other dementia researchers, which allows the opportunity for collaborative research and to ensure my research aims are strategic.
Davis	Dr Sandra	Centre for Applied Gerontology	Sandra.Davis@nh.org.au	CAG recently led a team developing a resource for Creating Dementia Friendly Physical & Social Environments in Residential Settings. I just completed 3 month travelling fellowship investigating models of dementia care overseas. Based in a health service & with significant community links, CAG is well placed to further research into identified gaps in applied and translational dementia research.
Sandlant	Ms Valerie	Masonic Homes Incorporated	vsandlant@masonichomes.com.au	The more time people with dementia spend doing typical things, that make sense to them, giving a feeling of contributing & of being worth while enhances their independence /ability or at least maintains it for as long as possible. A longitudinal study identifying what they want/need through the progression of their illness, without the confines of only being able to receive what services offer.

Surname	Title and Given Name	Department	E-mail	Attending this W/S
Kelley	Ms Heather	Masonic Homes Incorporated	hkelly@masonichomes.com.au	I am a practitioner rather than researcher that aims to work with a research body to over time identify if (& to what degree) continuing to engage the person with dementia in typical activities/in typical ways, enhances the persons independence/quality of life for the person/family, mitigates challenging behaviour, & impacts on the longevity/sustainability of informal caring arrangements.
Elder	Ms Jean	School of Nursing and Midwifery, Uni. of Tasmania	jean.elder@utas.edu.au	To learn more about dementia research methodology and its policy relevance. Currently I co-ordinate a research project looking at the trajectory of dementia care. My research interests are in information needs of family carers and professionals assisting PWD and in the service system response to PWD and their carers.
Pinikahana	Dr Jaya	National Ageing Research Institute, Parkville, Vic	jayap@nari.unimelb.edu.au	Dementia, Falls, incontinence in the elderly
Gorman	Ms Prue	Southern Cross Care (SA)	Pgorman@southernxc.com.au	To gain a clearer understanding of dementia research priority areas. Interested in role of cognitive rehabilitation in dementia management.
West	Prof Geoff	Department of Computing , Curtin University of Tech	G.west@exchange.curtin.edu.au	

Surname	Title and Given Name	Department	E-mail	Attending this W/S
Sinn	Dr Natalie	University of South Australia	Natalie.Sinn@unisa.edu.au	Broadly, effect of nutrients on learning, mood and behaviour across the life span. Specifically, the role of omega-3 fatty acids and exercise in reducing mild cognitive impairment in older age/dementia and delaying the onset of Alzheimer's Disease.
Vreugdenhil	Dr Anthea	Dementia Research Centre, Launceston General Hosp	anthea.vreugdenhil@dhhs.tas.gov.au	We are currently undertaking pilot studies to assess the feasibility and effectiveness of exercise programs in improving cognitive, behavioural and physical functioning in people with dementia in community-based and residential care settings. Other projects include The Early Detection and Treatment of Normal Pressure Hydrocephalus and Vascular Risk Factors for Alzheimer's Disease.
Van Emden	Mr Jan	Helping Hand Aged Care	jvanemden@helpinghand.org.au	Involved in several current & planned research projects within the aged care industry at a local, national and international level which have a component associated with dementia. Considered to be a topic of major relevance for planning future aged care service delivery.
Horner	A/Prof Barbara	Centre for Research on Ageing, Curtin University	b.j.horner@curtin.edu.au	Dementia is one of three primary research themes in the Centre. We are actively involved in psychosocial research - models of care across service sectors, care for PWD and their carers, and a member of the QUT CRC Research Centre. We were unsuccessful in our application in Round 1 and wish to submit in Round 2.

Surname	Title and Given Name	Department	E-mail	Attending this W/S
Pitkin	Jenny	Victoria University Social & Community Studies	Jenny.pitkin@vu.edu.au	
Burton	Mr Jason	Alzheimer's Australia WA	Jason.burton@Alzheimer.asn.au	
Peut	Ms Ann	Australian Institute of Health and Welfare	ann.peut@aihw.gov.au	To learn more about the requirements for the Dementia Research Grants to strengthen our application for the next round. Interested in health and care service use and pathways for people with dementia
Ballantyne	Ms Alison	School of Health Science	alison.ballantyne@unisa.edu.au	I have undertaken extensive research on service provision and older people and wish to further develop this field; network and link with other researchers. Research Interests: Care of older people; service provision; carers and providing support for older people and their families; interviewing older people with dementia. Qualitative research
Fiebig	Mr Jeff	ACH Group	jfiebig@ach.org.au	
Deigmann	Ms Ivy	ACH Group	idiemann@ach.org.au	
Unkles	Mrs Elizabeth	MAter Respite Service	liz@2bpampered.com.au	I am attending this workshop as I am a registered nurse involved with the planning and delivery of dementia respite care. I am interested in research the impact activities and care types has on dementia progression.
Foster	Mrs Marcia	MAter Respite Service	marcia.foster@mater.org.au	I am attending this workshop as I am a coordinator of a Respite Centre with a focus on dementia care. I am interested in general research areas and the use of therapeutic art counselling, reminiscence therapy with regard to dementia.
Wood	Mr Alison	University of Adelaide	alison.wood@adelaide.edu.au	Coordinator: Healthy Ageing Research Cluster, www.adelaide.edu.au/harc ,

Surname	Title and Given Name	Department	E-mail	Attending this W/S
Pachana	Dr Nancy	School of Psychology University of Queensland	npachana@psy.uq.edu.au	
Pond	Prof Dimity	University of Newcastle	Dimity.pond@newcastle.edu.au	I have a long standing interest in researching dementia, and mental health, particularly in the elderly, and specifically in general practice.
Smith	Wayne	CCEB university of Newcastle	Wayne.smith@newcastle.edu.au	
Lendon	Dr Corinne	Queensland Institute of Medical Research	corinne.lendon@qimr.edu.au	I am a new Lab Head at QIMR and new to Australia. I am seeking funding. My research group has a particular interest in the dementias. I brought DNA samples from patients and controls from the UK and these also have clinical, behavioural and neuro-pathological assessment. We use these to search for risk factors and phenotypic modifiers. We are using in vitro models of Alzheimer's disease.
Mitchell	Dr Patricia	Flinders University	patricia.mitchell@flinders.edu.au	
Cartwright	Ms Jane	Neurosciences Unit Perth / UWA	jade.cartwright@health.wa.gov.au	I am a Speech Pathologist working in the dementia field and PhD candidate at the University of Western Australia. I have chosen to conduct my research into the communication skills of individuals with dementia. In particular, I am interested in researching ways of supporting, managing and perhaps treating communication difficulties in hope of maximising quality of life & communicative potential.
Barnes	Dr Lynne	School of Nrs & Mid. University of South Australia	lyn.barnes@unisa.edu.au	Interest in the health and social care of older people. In particular issues related to confusion, behaviours of concern, restraint and clinical education of undergraduate nursing students.

Surname	Title and Given Name	Department	E-mail	Attending this W/S
Ullrich	Ms Sandra	Student at the University of South Australia	sullrich@aapt.net.au	
Toye	Dr Chris	School of Nursing, Midwifery & Postgraduate Med.	c.toye@ecu.edu.au	Care and support of people who have dementia and support of their carers
Crombie	Ms Ange	CHERC Bendigo Health	acrombie@bendigohealth.org.au	My interest has been in researching best practice pathways to better manage people with dementia and their carers. Behavioural & Psychological Symptoms of Dementia (BPSD) is my specialty area & I have been researching into, and developing, best practice behaviour management pathways.
McCutcheon	Prof Helen	School of Nursing & Midwifery, University of SA	helen.mccutcheon@unisa.edu.au	Professor McCutcheon research expertise is in collaborative multidisciplinary research, management of gerontic health issues and particularly in the multi-faceted problems of ageing, and healthy ageing. Prof. McCutcheon leads the School's education focus on healthy ageing as follows: Health & Ageing/management practices in aged care sector; frameworks for practice in the care of older people.
Kinsella	Dr Glynda	Psychological Science, La Trobe University	g.kinsella@latrobe.edu.au	Neuropsychology of mild cognitive impairment and AD
Chalk	Dr Jonathan	Department of Medicine/University of Queensland	j.chalk@uq.edu.au	Evaluation of dementia with magnetic resonance imaging
Nunn	Mr Russell	Royal District Nursing Service	rnunn@rdns.com.au	Royal District Nursing Service (RDNS) is currently undertaking a 3-year project concerned with the development of a model of care for community nursing clients living with dementia.

Surname	Title and Given Name	Department	E-mail	Attending this W/S
Barnes	Dr Lynne	School of Nrs & Mid. University of South Australia	lyn.barnes@unisa.edu.au	Interest in the health and social care of older people. In particular issues related to confusion, behaviours of concern, restraint and clinical education of undergraduate nursing students.
Richie	Maureen	ECH Inc.	mritchie@ech.asn.au	ECH is keen to collaborate with other aged care providers and research bodies to undertake research in the field of dementia, especially applied research (eg developing effective service models to support people with early dementia and family caregivers, managing challenging behaviours in the community, new models of respite and day programming for people with dementia).
Woods	Robyn	Department of Epidemiology & Preventive Medicine	robyn.woods@med.monash.edu.au	Large scale primary prevention trial of low dose aspirin in the elderly (ASPREE) with cardiovascular, dementia and cognitive decline outcomes.
Clay	Gerri	Independent Living Centre of WA Inc	gerri@ilc.com.au	Long standing research interest in dementia care; managed dementia specific services in both UK and Australia covering residential, respite, centre based and community. Particular interest in evidence based practise re application of Assistive Technology to enable and increase independence, Psycho social models, policy and innovation in service delivery
Millar	Lesley	Victoria University	l_millar@tpg.com.au	I am interested in looking at a commonality of approach to maximising the quality of research undertaken within the dementia research program and the National Continence Management Strategy program.

Surname	Title and Given Name	Department	E-mail	Attending this W/S
Neville	Dr Christine	Centre for Rural and Remote Area Health, USQ/UQ	nevillec@usq.edu.au	My interest here is concern about the health of Australians living in regional areas where there is a greater proportion of older people. It is important to conduct research in regional Australia so the needs of older people are appreciated and programs are targeted accordingly. Dementia will become the leading cause of disease burden for older people in these areas. Topics: BPSD & respite care
Anderson	Dr Barbara	Sansom Institute, Uni of SA	barbara.anderson@unisa.edu.au	My research interests include the coordination of care and medication management issues for community dwelling people with dementia and other chronic conditions.
Roe	Penny	Aged Care & Housing Group (ACH Group)	proe@ach.org.au	
Danthiir	Dr Vanessa	CSIRO Human Nutrition	vanessa.danthiir@csiro.au	Primarily to find out more about the dementia research grants and determine applicability. Areas of interest: Intelligence and assessment, age-related cognitive decline, cognition and nutrition, particularly omega-3 fatty acids
Li	Dr Yan	University of Southern Queensland (USQ)	liyan@usq.edu.au	To analyse EEG/MRI brain signals for various brain diseases such as dementia, epilepsy etc.
Millard	Dr Fiona	Psychiatry School of Medicine James Cook University	Fiona@fbmillard.org	
Kettle	Mrs Melissa	Box Hill Hospital: Aged Care/Cognitive Service	melissa.kettle@easternhealth.org.au	

Surname	Title and Given Name	Department	E-mail	Attending this W/S
Travers	Dr Catherine	University of Queensland	c.travers1@uq.edu.au	The research interests of the Australasian Centre on Ageing and the Academic Unit in Geriatric Medicine (UQ) are wide ranging. These include dementia, best practice for aged care and policy implications, healthy ageing, multicultural aspects of ageing as well as the development, implementation and evaluation of a geriatric tele-health program.
Mauil	Ms Cathy	Alzheimers Australia WA	cathy.mauil@alzheimers.asn.au	I would like to attend this workshop to be able to gain more knowledge and a better understanding of applying for dementia research grants. I work in the Respite Services department of Alzheimers WA and my interested areas of research is being able to identify service gaps and look at ways of improving respite services.
