Institutions with certified ethics review processes

National Certification Scheme

The NHMRC *National Certification Scheme of Institutional Processes Related to the Ethical Review of Multi-centre Research* (National Certification Scheme) reviews ethics review processes of institutions to ensure that they can facilitate single ethics review and that they meet the requirements of the *National Statement on Ethical Conduct in Human Research* (National Statement). NHMRC has assessed and certified the ethics review processes of the institutions listed in this document. Continuous certification is subject to ongoing compliance with the National Statement and fulfilment of other relevant requirements as set out in the *Certification Handbook*.

Prior to submitting a research application to any of these institutions, please contact the relevant institution regarding their readiness to conduct single ethics review of multi-centre research studies and the processes to be followed. These will vary at both institutional and jurisdictional levels.

Advice received from a Human Research Ethics Committee (HREC) undertaking single ethics review will not replace the need for local decision-making on matters of research governance. Final authorisation will occur through institutional or jurisdictional research governance processes.

National Mutual Acceptance Scheme

In 2013, the Victorian, South Australian and Queensland Departments of Health, and the New South Wales Ministry of Health signed a Memorandum of Understanding (MOU) for the National Mutual Acceptance (NMA) of ethics and scientific review of clinical trials conducted in each of the participating jurisdiction's public health organisations. In December 2015, the scope of NMA was expanded beyond clinical trials to include all human research. In August 2016, the Australian Capital Territory joined the NMA and Western Australia joined in August 2017.

In order for ethics reviews of human research to be accepted under NMA, the HREC conducting the review must be certified under the NHMRC National Certification Scheme, and also be a Certified Reviewing HREC under the NMA scheme. Please note that each of the participating jurisdictions may use their own online platform for submitting ethics and site-specific assessment applications.

Further information on the NMA, including a list of NMA Certified Reviewing HRECs and procedures for submitting ethics applications to these HRECs, can be found at:
