

NHMRC Peer Review Honour Roll 2025

The effectiveness and sustainability of NHMRC peer review is thanks to experts who identify the highest quality research and ensure the integrity of our processes. Our experts represent a broad health and medical research and translation sector, including researchers, clinicians, consumers and community representatives, from diverse backgrounds. NHMRC processes also include individuals from the broader community who independently observe and report on processes and proceedings used by NHMRC during peer review.

This honour roll recognises those who contributed to NHMRC peer review in 2025.

Grand total

Grand total of peer reviewers	2189
-------------------------------	------

Caveats

- B. These data provide a state/territory and institution breakdown of all peer reviewers (including panel chairs, peer review mentors, external assessors and community observers) appointed in 2025.
- As the data have been collected from information retrieved from Sapphire, the state/territory, institution and/or title of individuals listed may have changed since they completed peer review.
 - Institutions are listed in the state/territory in which an individual is based rather than the location of the institution.
- C. Where an individual has been a peer reviewer for multiple schemes, they have been listed once in the 2025 Honour Roll.
- Individuals whose institution is listed as 'Not Specified' were not associated with an institution or organisation for the purposes of their peer review duties or did not provide an institution or organisation in their Sapphire profile.
- D. Medical Research Future Fund assessors are recognised on the Department of Health, Disability and Ageing's Medical Research Future Fund [Roll of Honour](#).
