**Details of Partnership Projects 2018 Peer Review Cycle 2 Applications Recommended for Funding Commencing in 2019**

**About the Scheme**

NHMRC’s Partnership Projects scheme supports translation of research through effective integration of research evidence into health policy and service delivery. The Partnership Projects scheme funds researchers and partner agencies to work together to collaboratively define research questions, undertake research, interpret the findings and translate the findings into health policy and health practice.

The partners that researchers can work with through this scheme are many and diverse. They include hospitals, state governments, services and patient representative bodies. The scheme also represents a significant opportunity to leverage funds from partners. The grants in this submission, if approved, will leverage $11,539,747 in addition to the $8,214,143 provided through NHMRC’s Partnership Projects scheme.

**Funding Recommendations**

The applications listed in the table below were assessed against published criteria and found to be the most competitive and represent value for money. They are listed in application identification number (App ID) order:
